

Recertification of VA / ERP (required every 3 years)

Vulnerability Assessment and Emergency Response Program

- #1 Review and make sure all contact numbers, names and venders are current and up to date.
- #2 Review and make changes to VA or ERP if plant modifications and operations have been made.
- #3 See if any of the old identified Vulnerabilities have been fixed or taken care of or delete them or if new ones were indentified add them to the list.
- #4 If upgrades have been made a coordination meeting should be made and walk through with local agencies be completed and at the same time, share contact phone number sheets and concerns.
- #5 When the review has been completed print out 3 certification letters and send to Rural Development, DEQ and one in your file. At the bottom of the form, just Sign and date this certification letter. **Also Circle whether or not this is a newly Completed VA/ERP or just a 3 Year renewal Update!**
